CYBERSECURITY PACKAGES

We at Data Dynamics take cybersecurity seriously. We realize that SMBs need to protect their digital assets and remain in compliance in a cost-effective manner. **We offer four (4) different cybersecurity packages that can fit the budget of most SMBs:**

☑ **Bronze**   ☑ Silver
☑ **Gold**   ☑ **Platinum**

We also offer a la carte products and services so that our clients can pick and choose what they want just in case if any of the packages don't address all their needs.

Why wait for a cybersecurity incident to happen? Contact us now, and one of our representatives will work with your team to select the services that properly align with the needs of your organization

Cyber Security Package	Product/Service	Service Type
Bronze Plan	Information Security Policy	Policy Document
	Business Continuity Plan	Policy Document
	Incident Response Policy	Policy Document
	Cloud Care Antivirus	Basic Endpoint Protection
	Email Spam Filtering and Encryption (Basic DLP)	Email Security
	VPN/2-Factor Authentication (Remote Users)	
	Dark Web Monitoring	Monitoring
	Phishing Simulations	Training
	Cybersecurity Awareness Training	Training
	Annual Disaster Recovery Drill	Business Continuity
	Gateway/Unified Threat Protection on Firewall Consisting of IPS, Content Filtering and Deep Packet Inspection	Network Security

Complimentary Cybersecurity Services

Using one (or more) of our complimentary service is the best way to discover vulnerabilities before they turn into liabilities. It is also a great way to learn how well your current IT personnel are protecting your organization. Once we share the results with you, you can use your existing IT personnel to address the gaps. Our free-of-charge, no strings-attached services include:

Cybersecurity Assessment	Vulnerability Scan	Office 365 Email Threat Scan	Dark Web Scan

NIST Framework for Cybersecurity

NIST (National Institute of Standards and Technology) is a government organization that has published and continues to maintain framework consisting of standards, guidelines, and best practices to manage cybersecurity risk. NIST Cybersecurity Framework, the most respected and popular framework in the industry, rests on the following five (5) pillars:

- ☑ Identify
- ☑ Protect
- ☑ Detect
- ☑ Respond
- ☑ Recover

At Data Dynamics, we follow NIST framework and our Cybersecurity offerings are evaluated against these pillars.

Cybersecurity Packages and NIST Framework
